

A MESSAGE FROM
TRANSPLANT MANITOBA

Give life to a family member, a friend or a total stranger by becoming a living kidney donor

It is possible for a healthy living person to donate one of their two kidneys to someone in need. Donating a kidney can significantly improve the life of a person with **Stage 5 Chronic Kidney Disease**. In the ideal case, the kidney transplant can take place **before** the patient goes on dialysis.

If you or someone you know is interested in receiving more information about becoming a living kidney donor call Transplant Manitoba's Living Kidney Donor Coordinator at **204-787-2400**. Or visit **www.transplantmanitoba.ca** for more information.
